- Multimedia specifically designed to suit individuals with special needs

Access to digital content with tens of thousands of multimedia resources ready-to-use and searchable through MediaCAST

MediaCAST provides you with the unique option of selecting what content you would like in your digital library. By purchasing one or more digital content packages, you allow teachers and students immediate access to tens of thousands of digital media titles and the exciting MediaCAST content integration features.

Obtaining the digital rights and encoding all of the DVDs and VHS tapes in your analog library takes time. By supplementing your analog resources with Plug & Play content, you can take full advantage of your new MediaCAST system right away. All of the content from the publishers listed comes with detailed metadata for easy searching, copyright and licensing and state standards integration.

Powered by the #1 non-fiction media company in the world, **Discovery Education** is the leading provider of high-quality, curriculum-based digital content, professional development, and assessment resources whose services are available to more than 35 million students nationwide.

CCC! From New Dimension Media is a digital library filled with core curriculum media created specifically for K-12 classrooms. CCC! is comprised of over 3,000 titles with hundreds of new titles added each year. Recent additions to the CCC! library include thirteen episodes of Bill Nye's "Eyes of Nye" and 40 BBC Motion Gallery science and environment titles.

Learn360 is an educational content provider who recently upgraded their library to include over 8,300 video titles. Along with video, Learn360 offers audio files, images and supplemental materials.
